

Sweden AI presentation

Hedvig Wurnell and Simon Aasen

Hands-on learning with clear boundaries

- Deliberate choice of a hands-on, applied approach
- Use existing, secure tools (copilot)
- Learning-by-doing rather than theory
- Auditors encouraged to experiment in daily tasks

Performance audit

- More efficient and higher quality
- Saving time on repetitive tasks
- Interviews: Transcriptions

Effects in performace audit

- Auditors find their own relevant use cases
- AI supports method, writing and coding
- Cognitive surrender

Finacial audit

- Copilot
 - Find assignments
 - Refine texts
 - Excel
 - Agents
- Datasnipper
 - Tick and tie

Handling sensitive data remains a key challenge

- One challenge is how to handle sensitive data
- We cannot use all data
- We focus on what can be done instead of waiting

Key messages

- Enable practical learning
- Think twice about sensitive data and maintain responsibility
- AI supports – doesn't replace – professional judgement
