

ALSAI as part of the First Meeting of the Inter Institutional Network of Coordinators “Parliament – Independent Institutions” to Strengthen Parliamentary Oversight

The first technical meeting of the Inter Institutional Network of Coordinators “Parliament – Independent Institutions”, organized by the Parliament of Albania in cooperation with Global Partners Governance (GPG) was held on 26 November 2024 in Tirana.

This initiative aims to strengthen parliamentary oversight and improve cooperation with independent institutions in a continuous and sustainable manner.

The Inter Institutional Network of Coordinators “Parliament – Independent Institutions” will include permanent representatives from each independent institution that reports to Parliament, thereby establishing a sustainable structure for communication and coordination. This will enable Parliament to carry out effective monitoring, ensure greater transparency, and have reliable access to information. The Network will collect and share the information necessary for monitoring and implementing recommendations.

Through the “Support to Parliament and Civil Society” (PACEP II) project, the Swiss Government aims to support and strengthen parliamentary oversight within the framework of Albania’s European Union integration process.

One of the pillars of the project focuses on strengthening independent institutions. The project aims to enhance the capacity of independent institutions to provide actionable and measurable recommendations through new, high-quality reporting standards and staff capacity building.
